

# ➤ 230 Series Triangle Scoreboard

➤ The triangle display is a multipurpose display for Athletics and similar sports.  
The display has three 230mm height digits on each of its three sides for displaying information visible in 360 degrees.

The brightness of the digits offer superb viewing outdoor even in direct sunlight. With its built in light sensor the board automatically sets its brightness for the surrounding environment and can therefore also be used indoors.  
The display is mounted on the included tripod.

A brass bell is available as an option.

The triangle display is controlled from its wireless remote where the operator can select mode and enter results.

The board can display:

- Lap Counter
- Temperature
- Pace Clock (countdown concentration clock)
- Windmeter (requires optional windmeter head)
